

Direct the agent. *Own the disclosure.*

An eight-week executive certification in agentic AI for GRI, BRSR and IFRS S1 & S2 reporting.

Reporting cycles that took a quarter now take weeks — in the hands of someone trained to run the workflow. Built by producing real disclosures with AI, not by memorising frameworks.

PROOF, NOT PROMISES

 **10,500+**

professionals trained by ESGPro

 **4.8 / 5**

average learner rating

 **4**

portfolio-grade capstone projects

 **20**

seats per cohort

Viveck Jai Suman, CFA

Founder & lead mentor • 22+ years in finance and sustainability

You leave with disclosures you produced, not a certificate.

01 LEARN

Frameworks, taught live

02 BUILD

An artefact every week

03 AUTOMATE

A working ESG agent

04 PRESENT

Demo Day, week eight

FORMAT

8 weeks, live cohort

COMMITMENT

5–7 hours a week

BUILT FOR

Finance, audit, EHS

OUTCOME

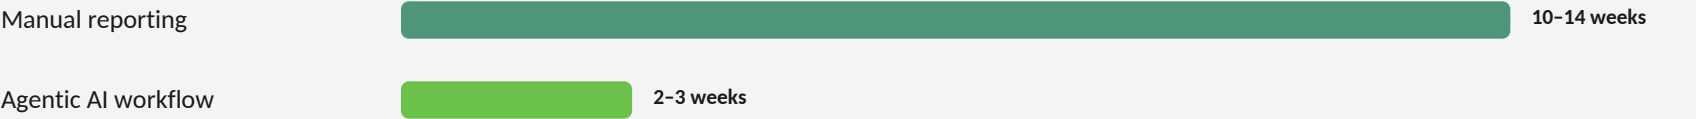

A four-project portfolio

Institute-reported figures, September 2026. No environmental science background required; outcomes vary with the work submitted and are not guaranteed.

The reporting cycle collapsed. *The expert's job did not.*

An agent can pull operational data, test it against GRI or BRSR indicators and draft the narrative in the time it used to take to schedule the kickoff.

One BRSR reporting cycle, start to filed

Source: Illustrative BRSR reporting cycle, mid-size listed company

SEBI BRSR

Mandatory, principle-wise disclosure with assurance expectations.

IFRS S1 & S2

The ISSB baseline investors are already pricing in.

EU CSRD

Converging with BRSR and ISSB into one disclosure architecture.

What an ESG reporting role now demands	Self-study and free frameworks	A generic AI course	This programme
Know GRI, BRSR and IFRS S1 & S2 side by side	✓	—	✓
Produce a BRSR draft from a real dataset	—	—	✓
Build a Scope 1-3 inventory from messy operational data	Partly	—	✓
Configure an agent that flags disclosure gaps	—	Partly	✓
Have the output reviewed by a practising CFA	—	—	✓
Walk out with work a hiring manager can inspect	—	—	✓

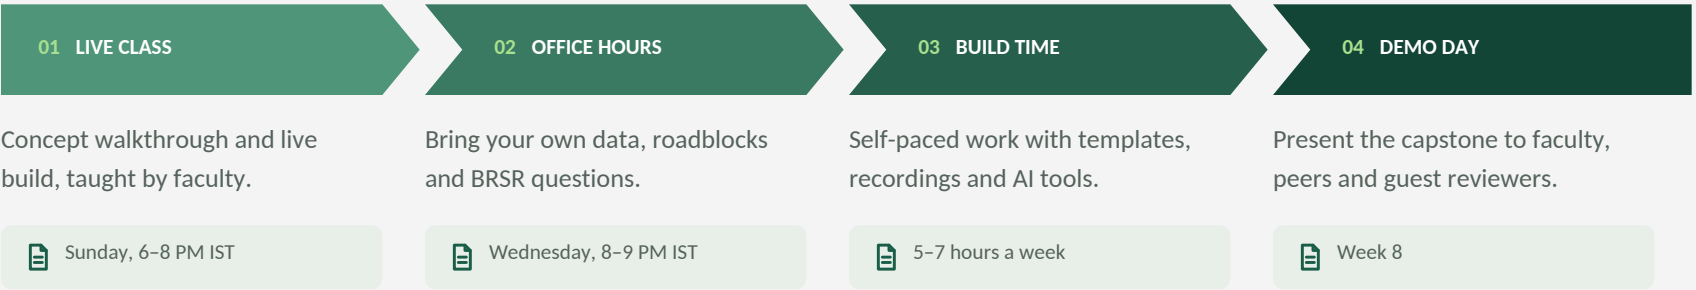

AI does not remove the expert. It raises the bar for what the expert must do: direct the agent, validate the output, and own the judgment calls AI cannot make.

Which is why every week of this programme ends in something you built and can defend.

02 / HOW THE EIGHT WEEKS RUN

One fixed evening. *Built to survive a full-time job.*

Sunday is the only mandatory live session. Everything else is recorded, asynchronous and designed to be caught up on.

WORKSTREAM	WK 1–2	WK 3–4	WK 5–6	WK 7	WK 8
Live sessions	Every Sunday, live Recorded and available immediately; falling a week behind is normal, not disqualifying.				
Frameworks	GRI, ISSB, SASB	GRI + BRSR	IFRS S1 & S2		
The build		BRSR draft	Carbon inventory	The agent	
Office hours	Wednesday, small group On your own data, sector and reporting context.				
Demo Day					Present

Where the eight weeks go

- 50% Frameworks: GRI, BRSR, ISSB
- 37% Carbon accounting and the agent
- 13% Capstone and Demo Day

Designed around the job

Every live session is recorded and available immediately. Office hours exist to catch you up, and a seat can be paused for one cohort cycle without penalty if work becomes unmanageable.

03 / CURRICULUM

Eight weeks, *eight artefacts.*

Each week pairs the concept taught with the thing you produce. The certification is awarded on all eight plus the Demo Day presentation.

WEEK 01

Orientation and foundations

- GRI, BRSR, ISSB and SASB side by side
- Where agentic AI safely fits

Builds: Framework Selection Brief

WEEK 02

Risk, materiality and the reporting model

- ESG risk through an eight-step reporting model
- Materiality taken to a stakeholder-tested output

Builds: Materiality Matrix

WEEK 03

GRI Standards mastery

- Universal Standards and the 200, 300 and 400 series
- AI accelerating disclosure-to-data mapping

Builds: GRI Content Index

WEEK 04

BRSR mastery

- SEBI's nine principles and BRSR Core indicators
- What assurance actually demands of a disclosure

Builds: BRSR Draft Report

WEEK 05

Climate and financial risk

- ISSB governance, strategy, risk and metrics pillars
- Scenario data turned into investor-grade disclosure

Builds: Climate Risk Disclosure

WEEK 06

Carbon accounting

- Scope 1, 2 and 3 under the GHG Protocol
- AI to clean, categorise and calculate from messy data

Builds: Scope 1–3 Carbon Inventory

WEEK 07

Designing the reporting agent

- Multi-step agentic workflows, no code required
- Gap-flagging against GRI and BRSR indicators

Builds: A working ESG reporting agent

WEEK 08

Demo Day

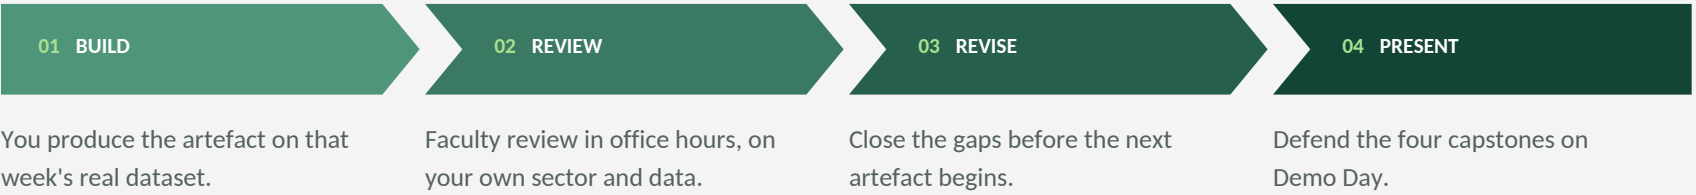

- Present the capstone to faculty and guest reviewers
- Defend the judgment calls the agent could not make

Builds: The assessed capstone presentation

Four projects. *One portfolio.*

The proof points hiring managers and leadership reviews actually ask to see.

THE PORTFOLIO		WHY IT IS THE PROOF POINT	
1	BRSR draft report Principle-wise disclosure built from a real dataset.		The single most requested proof point in ESG hiring.
2	Scope 1-3 carbon inventory An AI-assisted model turning operational data into an auditable baseline.		Proves emissions accounting rather than claiming it.
3	Materiality matrix Stakeholder-informed and GRI-aligned, in board-ready visual form.		Shows judgment, which is what the exam of the job tests.
4	ESG reporting agent A working no-code agent that flags disclosure gaps and drafts language.		The capability almost nobody in the market can demonstrate.

6

capabilities you will have personally produced
Draft a full BRSR report · build a GHG inventory in hours · run a materiality assessment · map disclosures to IFRS S1 and S2 · design an ESG reporting agent · present with authority.

The certification is awarded on

-  All eight weekly artefacts
-  The four capstone projects
-  The Demo Day presentation

05 / THE STACK AND THE TOOLKIT

No coding required. *Every tool inside a real task.*

The stack is taught by using it on a reporting job, never as a tools tour.

LLM copilots

Structured prompting for compliance-grade drafting, summarisation and gap analysis.

No-code agent builders

Multi-step workflows that pull, validate and route ESG data without code.

Data cleaning and automation

Messy spreadsheets and utility bills turned into audit-ready emissions data.

Prompt libraries for ESG

A reusable prompt set mapped to GRI, BRSR and IFRS S1/S2 requirements.

Visualisation and dashboards

Materiality matrices and emissions trends in board-ready formats.

Version control for reports

Iterative drafts across a live reporting cycle without losing the audit trail.

Templates you keep

- ✓ GRI content index and tracker
- ✓ BRSR principle-wise workbook
- ✓ Materiality worksheet
- ✓ Scope 1-3 calculation sheet
- ✓ IFRS S1/S2 template
- ✓ AI prompt library per framework
- ✓ Board-ready report deck
- ✓ Disclosure gap checklist

No coding required

Every tool is taught inside a real reporting task, never as a tools tour. If you can build a spreadsheet, you can build the agent.

The audit trail stays

Version control across a live reporting cycle is part of the method. An agent that cannot show its working is not usable in a disclosure.

Finance-first, *not science-first.*

GRI and BRSR reporting are regulatory and analytical disciplines, so a finance or compliance background is an advantage, not a gap to fix.

ESG Analyst

Owns data collection, disclosure mapping and reporting support.

ESG / Sustainability Manager

Leads BRSR and GRI cycles and represents ESG in leadership conversations.

Carbon & GHG Specialist

Builds and maintains emissions inventories across Scope 1, 2 and 3.

ESG Advisory Consultant

Supports multiple client organisations through reporting and compliance cycles.

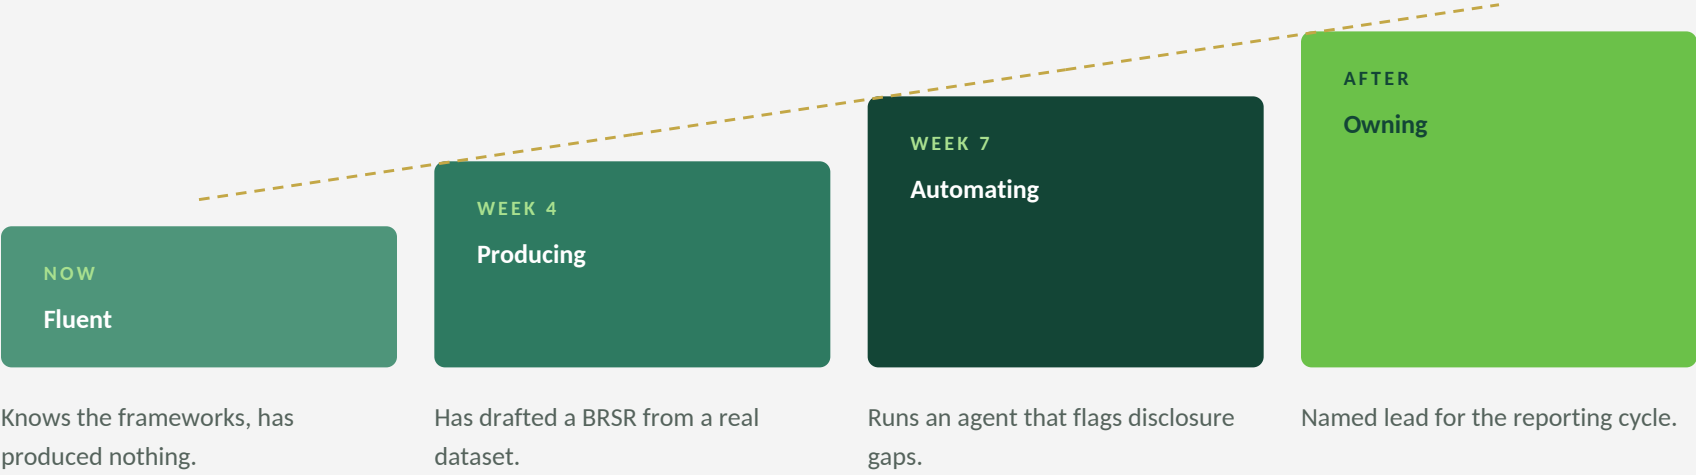

Internal BRSR Owner

Becomes the organisation's named lead for statutory BRSR compliance.

ESG Data & Automation Lead

Designs and maintains the agentic workflows behind the reporting stack.

Who this is for

Finance and audit professionals, internal auditors, EHS and CSR managers, and CAs, CFAs and MBAs moving into ESG.

Who this is not for

Anyone wanting a certificate without producing the artefacts, or unable to commit one live evening a week.

07 / FACULTY AND PROOF

One practising CFA, *teaching every session.*

Live sessions are taught directly and never delegated to teaching assistants.

FOUNDER & LEAD FACULTY

Viveck Jai Suman, CFA

Founder & Managing Director, ESGPro Mastery Institute

A CFA charterholder and certified sustainable-investing professional with 22+ years across investing, transaction advisory and sustainability. He founded ESGPro Mastery Institute, has authored two books, and advises corporate clients in India, Oman and Saudi Arabia. Every case in this programme comes from engagements he has actually run.

- ✓ CFA charterholder · Sustainable Investing Certificate
- ✓ Former Director, Grant Thornton
- ✓ ESG Risk & Opportunity, University of Pennsylvania
- ✓ Former CFO in renewable energy and EV

The alumni shown completed ESGPro programmes across the portfolio; they are not presented as graduates of this certification. Individual outcomes reflect each participant's own work and experience; they are not typical or promised. Names and roles are held on file and used with permission.

One fee. One cohort. *Twenty seats.*

Capped because reviewed artefacts and small-group office hours do not scale past it.

INDIVIDUAL PROGRAMME FEE ₹69,000 One payment, certification included. 8 weeks live, faculty-led - GRI, BRSR, IFRS S1 & S2 and the agent - All templates and the AI prompt library - One year of alumni access	IN INSTALMENTS ₹5,750 Per month, twelve months. - Twelve monthly payments - Same programme, same inclusions	TEAMS AND IN-HOUSE On application Invoiced to the company. - Invoicing in the company name - Run on your own reporting data
---	---	---

Withdraw in the first week

No-questions-asked withdrawal within seven days of the cohort starting, and the option to pause your seat for one cycle.

Financial assistance

Need-based assistance is considered on request. Ask before you apply rather than after.

Enrolling a team?

Company invoicing and private cohorts on your own reporting data, arranged case by case.

Book the call. Bring the problem.

Cohorts run on a rolling basis; seats are confirmed in the order applications are accepted.

- 1 Scan the code and book a counselling call
- 2 We check the fit against your reporting obligation
- 3 Confirm your seat and the next cohort date
